“Talkin’ Trash”

Bever Grade Cleanup

As several people mentioned in our recent survey, Bever Grade has been used by many as a dump site - disrespecting and polluting our land. In September the Solid Waste & Recycling team worked to clean up the dumpsite on Bever Grade. It took four days and a lot of work. A total of **14,020 lbs (7 tons) of trash** and **1,800 lbs (0.9 tons) of tires** were hauled to the landfill. Please help us keep Bever Grade and the rest of our reservation clean—respect and take care of the earth—for our future generations....Qe'ciyéw'yew'
