General Conditions:			
A. All wells require a Water Use Permit prior to issuance of a Well Drilling Permit. Use of the well must comply with conditions of the associated Water Use Permit.			
B. Drilling of wells shall be coordinated with the Nez Perce Tribe’s Water Resources Division (“WRD”) and Land Services Division. All wells must be drilled a minimum distance of 100’ from a drain field. <u>Domestic</u> and <u>Public Water Supply</u> wells must be drilled a minimum of 50’ and 100’ respectively from a septic tank.			
C. The well shall be constructed by a driller currently licensed in the State of Idaho who must maintain a copy of the drilling permit and the well identification tag at the drilling site.			
D. Approval of this permit does not authorize trespass on the land of another party.			
E. This permit does not represent a right to divert and use Tribal water rights.			
F. No construction of diversion works or diversion of water or other alteration of any water source, is allowed under the Water Use Permit until the expiration of the later date of either: (1) 20 days after the expiration of the Notice of Permit Issuance described in §3-3-11 (f) of the Nez Perce Tribal Water Rights Administration Code (“§3-3”), if no objection to the Water Use Permit has been filed; or (2) final resolution of any objection to the Permit pursuant to a hearing pursuant to §3-3-13, including any subsequent appellate process on such objection.			

General Conditions (continued):

- G. A Water Use Permit to pump or divert more than 25 gallons per minute shall require the installation and maintenance of a flow rate and total use metering system, at the permittee's expense.
- H. The Water Use Permit constitutes a right of entry for WRD personnel to the entire location of permitted water use, for purposes of inspection, monitoring, and Permit enforcement.
- I. If the depth of this well exceeds 500' or the well is in an area known to have low temperature geothermal ("LTG") water, bottom hole temperature must be measured and recorded on the Well Driller's Log, and reported on the ["Well Driller's Report"](#).
- J. If a bottom hole temperature of 85°F or greater is encountered, well construction shall cease and the well driller shall contact the WRD immediately.
- K. The applicant or contractor must contact "DigLine" (a one-call center for utility notification) not less than 2 working days prior to the start of any excavation for this project. The "DigLine" number for this area is 1-800-342-1585.
- L. Any well being replaced by a new well shall be properly abandoned by the well driller prior to removing the drilling equipment, unless otherwise authorized by the WRD. An ["Authorization to Abandon a Well"](#) form must be completed for abandonment.
- M. The stainless-steel identification tag must be **securely and permanently attached** to the well casing by the Driller upon completion of the well, and prior to removing the drill rig from the drill site and must remain permanently attached above ground level for the life of the well. The well tag shall be attached by welding at least three sides or using four stainless-steel, closed-end pop rivets.
